6.2.1 - The institutional Strategic/ perspective plan is effectively deployed

The IQAC plays a crucial role in designing and guiding the institutional strategic plan, focusing on enhancing all departments within the college. The institution has identified several essential quality assurance areas to ensure continuous growth and improvement. With these thrust areas in mind, we have carefully planned the following developments to be implemented:

- 1) The institution shall adopt an intensive teaching-learning approach, continuously enhancing teaching techniques to ensure an improved curriculum delivery in line with the introduction of the National Education Policy (NEP) system.
- 2) To provide placement opportunities that align with the industry requirements by empowering students with enriched skillsets through value-added programs.
- 3) A strong emphasis on faculty development, particularly in research engagements and publications in reputed and acknowledged indexed journals.
- 4) To foster stronger industry-institution engagements to provide practical hands-on training through industry-certified programs and training.
- 5) Promoting a seamless integration of theoretical knowledge and practical application through our extension programs.
- 6) ICT- oriented learning: Plan to install smart boards in all classrooms, providing a dynamic and engaging platform for effective participative learning.
- 8) Establish a PG center corresponding to commerce & management education.
- 9) Institutional Collaboration: International CMA AND ACCA Partnerships

Our institution shall actively seek collaborations with international Certified Management Accountant (CMA and ACCA) organizations. These partnerships are characterized by their global scope, enabling us to connect and engage with esteemed institutions worldwide.

10) Plan to upgrade our infrastructure by adding many classrooms, enhancing the overall facility for our students and faculty.
