7.1.7 Creating an Inclusive Environment: The Institution's Commitment to Accessibility for Divyangjan
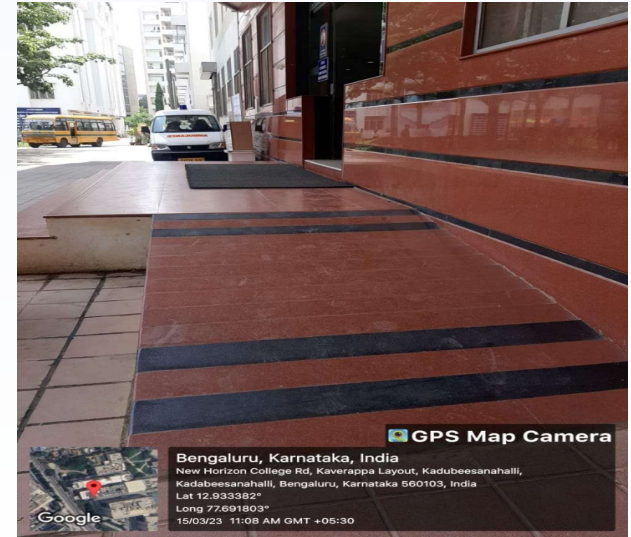

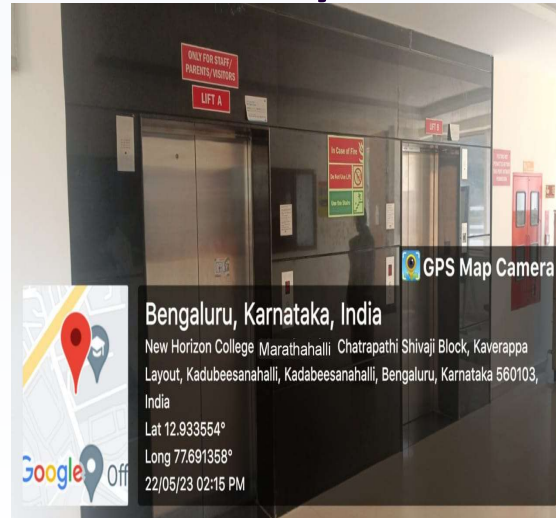

# GEO TAGGED PHOTOS

Outline

In order to foster inclusivity and accessibility, Our institution creates an environment that caters to the needs of Divyangjan. By implementing appropriate accommodations and promoting understanding, we are ensuring equal opportunities for everyone.

1) Removing Barriers:
Ramps and Lifts for Easy Access to Classrooms

Ramps and lifts are for ensuring that individuals with mobility impairments can easily access different parts of the institution, including classrooms and other facilities. Ramps are designed with appropriate slopes and handrails for safety.

2) Empowering through Technology:
Assistive Technology and Facilities for Divyangjan

Providing assistive technology such as screen-reading software, accessible websites, and mechanized equipment can empower individuals with various disabilities. Accessible websites ensures that online content is compatible with screen readers, making digital information more accessible.
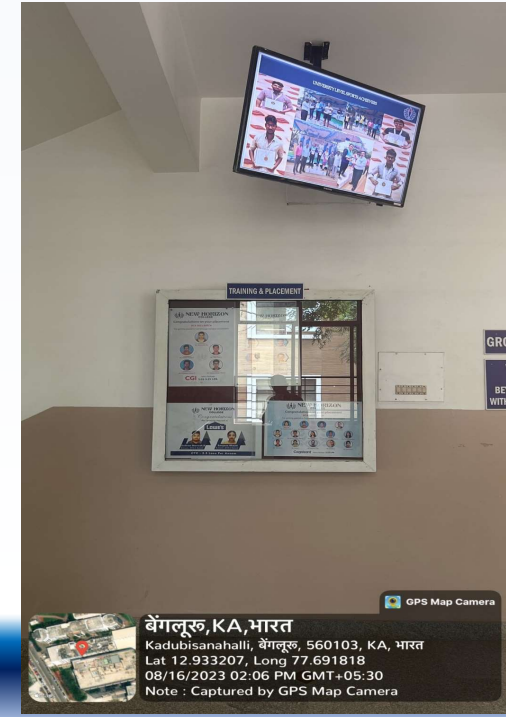

3) Prioritizing Inclusivity: Divyangjan-friendly Washrooms for All

Accessible washrooms are designed with features like grab bars, wider doorways, lower sinks, and appropriate space can make a significant difference for people with disabilities. These facilities ensure that everyone can use the washrooms comfortably and independently.
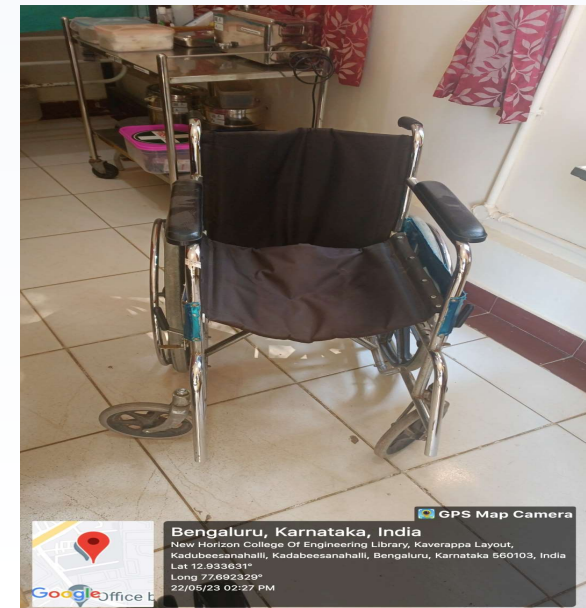

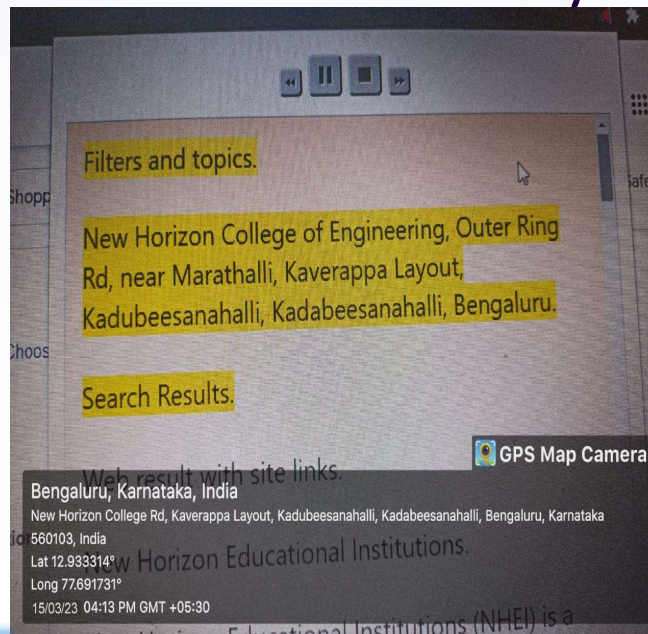

4) Navigating with Ease:
Signage and Tactile Pathways for Improved Accessibility

Tactile paths and clear signage with high contrast colors and large fonts can assist individuals with visual impairments in finding their way around the institution.

5) Ensuring Accessible Information:
Human Assistance and Readers for Divyangjan Students

Offering human assistance, readers, scribes, and screen reading options can help individuals with disabilities access information and participate in discussions and assessments. Providing soft copies of reading material ensures that content can be accessed electronically, making it easier to adjust text size and use screen-reading software.
