How to Succeed AI Enabled World

Date: 12th August 2025
Time: 12:30 PM - 2:30 PM
Title of the Event: Guest Lecture on - How to Succeed AI Enabled World
Venue: Chanakya Seminar Hall
Target Audience: Final Year BCA Students
Organised by: Department of Computer Applications & IQAC
Coordinator: Ms. Chaithra N
Faculty Coordinator: Ms. Nanditha Mathad S, Ms.Namrata Awasthi, and Ms. VK Durgadevi
Student Coordinator: Mr. Rahul P, Ms. Raksha R, and Ms. Bhavana.R

About the Event
The Department of Computer Applications in association with IQAC conducted a guest lecture for the Vth semester BCA students.

Objectives

1. To guide students in understanding how Artificial Intelligence can efficiently perform and automate multiple tasks.
2. To raise awareness about the role of AI in key technological domains such as Big Data, Python, DBMS, and Java.
3. To foster a collaborative mindset that promotes synergy between human intelligence and AI capabilities.
4. To introduce real-world expertise and practical insights that complement academic learning.
5. To bridge the gap between classroom concepts and their applications in industry and everyday life.
6. To enhance students' problem-solving skills through a deeper understanding of AI-driven solutions.

The Department of Computer Applications, in collaboration with IQAC, organised an insightful guest lecture titled "How to Succeed in an AI-Enabled World" on 12th August 2025. The event was held at the Chanakya Seminar Hall and witnessed enthusiastic participation from the final-year BCA students.

The session was led by Dr. Manisha Singh, a distinguished academician and researcher from the ICFAI Group of Institutions, Bangalore, with over 20 years of experience in research and education. Dr. Singh delivered an engaging and interactive lecture, shedding light on the evolving landscape of Artificial Intelligence (AI) and its growing relevance across industries. She emphasised the expanding scope of AI and the diverse career opportunities it presents in domains such as Human Resources, Marketing, Finance, and Information Technology.

Dr. Singh encouraged students to adopt a forward-thinking mindset and highlighted the importance of continuously upgrading their skills and knowledge to stay competitive in the AI-driven job market. The lecture also explored strategies employed by leading companies to integrate AI into their operations, offering students a glimpse into real-world applications and trends.

Dr. Singh discussed how AI can complement human intelligence, and how students can harness this synergy to create innovative solutions and future-ready careers. A dedicated Q&A segment allowed students to actively engage with the speaker, ask questions, and exchange ideas. The session fostered critical thinking and collaborative discussion, leaving students inspired and better informed about the transformative potential of AI.

Outcome

The session empowered students to cultivate a growth mindset toward learning new concepts in artificial intelligence. It enhanced their understanding of how AI integrates across various fields.

Ultimately, the speaker raised awareness about how students can leverage AI to overcome job-related concerns, rather than fear them.

"AI is a tool, not a threat."

Glimpses of the Workshop

Welcoming the Guest Speaker by BCA Head of the Department, Dr. Nagaraj Kilari
